Supporting Children and Young
People's Health: Improving Asthma
Care Together

The Royal College of Paediatrics and Child Health (RCPCH) has approved this online learning product from 20 July 2022 in accordance with RCPCH CPD guidelines.

This course was originally developed in partnership with [The George Coller Memorial Fund](#).

Welcome to this free eLearning resource, designed for anyone who supports children and young people with asthma. The course is aligned to the Tier 1 Capabilities set out in the [National Bundle of Care for Children and Young People with Asthma](#) and successful completion of the eLearning certifies you as having achieved the capabilities for Tier 1. **Your certification is valid for 24 months from the date of course completion** (as recommended in the Capabilities Framework) – **you will not be able to retake the course and generate a new certificate during this period**. However, we strongly recommend that you keep your asthma knowledge up-to-date and seek advice if you are unsure how to support a child or young person in your care. A list of useful resources can be found at the end of this course, along with a downloadable summary resource that can be used to evidence how you are keeping your knowledge up-to-date.

We encourage anyone who supports children and young people to complete this module. This may include, but is not limited to:

Committed to excellence

Working together

Facing the future

and can return to review the material at any point during your 12-month period (as noted on the date of registration).

We hope you find the course useful and that any questions you currently have about supporting the children and young people in your care will be answered as you work through the module. However, if you find that you would like to know more once you have finished, please visit the 'Resources' section for details of useful websites. Alternatively, please use the 'Contact Us' section to direct your questions to our expert team.

Step 7: To come back to your elearning, follow Step 1
